Kindergarten Curriculum

Academic Program

Program Description

The kindergarten program is multi-sensory (uses all the senses to input information in the brain,) developmental (concepts and skills introduced are appropriate for the student's age and ability,) and sequential (one skill or concept builds upon another.)

Thematic Approach

The program introduces concepts and skills in and around a theme. The theme adds interest and engages the child in the learning process.

Philosophy

Each child is unique. Every child is a learner. Learning is pleasurable. Human beings are programmed to learn in order to survive. Learning is fun. Learning through play is the work of childhood.

Self-confidence and self-esteem are a natural result of competence. The goal of the program is to provide each child with multiple opportunities to develop competence in all areas.

Success Begets Success

Activities are structured to provide many successful experiences everyday. Lots of praise and positive reinforcement are used.

Religion/Scripture

The religion program focuses on spiritual formation. The primary text series is Image of God Series published by Ignatius Press.

A comprehensive Catholic program combines doctrinal and scriptural lessons with developmentally appropriate art and craft projects and other hands on activities.

Text

“Who Am I” from Image of God, published by Ignatius Press

Aim

To give the kindergarten students a knowledge of God the Father, the life of our Savior, the Blessed Mother, and the Saints. There is a special emphasis on God’s love for us. The children will learn the Sign of the Cross and several traditional Catholic prayers.

Theme

The series is centered on a new subjective emphasis found in the writings and teachings of John Paul II. This subjective turn stresses the dignity of each individual as a person made in the image of God.

The kindergarten program has as its focus two key ideas: God and creation. These key ideas form the unifying element of the lessons. The material in each lesson revolves around fundamentals of our faith stated in terms the children can understand and remember.

Reading/Language Arts

Language Arts

The HMH Into Reading program integrates phonics, spelling, grammar, writing, and reading into an exciting series centered around character development.

Reading

The children are introduced to some sight words along with phonetic words and decodable text. Reading For All Learners includes stories and phonetic readers used to begin the reading process. Children progress at their own rate and are highly motivated when they see their progress.

Supplemental Readers

- † We Both Read
- † National Geographic Publications

Listening/Speaking

The Academy's program incorporates listening and speaking as an integrated whole. Students will:

- † Listen for understanding
- † Follow directions
- † Recall information
- † Enunciate
- † Express feelings
- † Share ideas
- † Tell and retell stories
- † Give oral reports
- † Make introductions
- † Participate in discussions
- † Enjoy musical and listening games

Vocabulary

Kindergarten students have a developmental sensitivity for new and interesting words. The Academy's vocabulary program provides an engaging, systematic approach to new words. Students will:

- † Understand new word meanings
- † Use new words in everyday language
- † Incorporate new words in writing assignments

Handwriting

The children will learn to print the alphabet, numbers 1 – 10, and first and last names. They will also learn the mechanics of a variety of types of readiness papers used for reinforcement.

Arts and Crafts

The children will explore many art mediums as their own creativity unfolds. In the process, they will develop competence in the following:

- † Cutting and pasting
- † Clay
- † Drawing
- † Finger and Tempera painting
- † Coloring

Students are also introduced to the “Masters” and their great works.

Music

Music appreciation is developed by exposure to a variety of music and the life story of great composers.

Students also learn to use a variety of Orff instruments and enjoy singing many fun songs.

A musical performance is presented twice a year (December and June) to provide the students with the opportunity to demonstrate their skills and gain poise and confidence in front of an audience.

Math

The math program utilizes McGraw-Hill's My Math text. Math comes easily to small children when it is presented with copious amounts of hands on experiences. The math lab is full of manipulatives for children to use to experience numbers and shapes.

Students in kindergarten will be introduced to:

- † Montessori golden beads 1 – 9,000
- † Telling time to 1 hour
- † Simple fractions
- † Measurement
- † Simple addition and subtraction
- † Patterning
- † Counting by 1, 2, 5, and 10
- † Rote counting to 100
- † Money concepts
- † Numerals 0 - 100 plus
- † Geometric shapes
- † Sorting and classifying materials
- † Ordinal numbers
- † Sets of more, less, equal to

Science

The Academy's program develops observation skills and inquiry. The children are exposed to the scientific method. Lots of hands on and in class experiments are used to provide a concrete experience. Units of study in kindergarten are:

- † Plants
- † Animals
- † Magnets
- † Water cycle (Evaporation)
- † Air

The Simple Solutions curriculum reviews prior concepts for optimal long term retention.

Social Studies

The students will learn about their immediate neighborhood and the broader community. They will explore themes that focus on:

- † My neighborhood
- † The city
- † The farm
- † Community helpers
- † Transportation
- † Rules and laws

Health

Students will develop an understanding of personal health and safety issues such as:

- † Good eating habits
- † Proper rest and exercise
- † Good hygiene
- † Personal cleanliness
- † Seat belt use

STEM

Students integrate Science, Technology, Engineering, and Math in a variety of problem solving opportunities.

Computers

These skills are introduced in the classroom through the computer and SMART Board for integration into the curriculum to help children learn how to research and process information. Each student has an Imagine Math account and works at his/her own level and pace in the computer lab.

Library

Students come to the library weekly to check out books at their reading level. When research projects are assigned, students are directed to the appropriate subject matter.

Specials

Physical Education

Kindergarten students learn to move their body through space in a coordinated purposeful way. They will master basic motor skills and explore factors that affect a healthy lifestyle. Students will:

- † Demonstrate ball handling skills
- † Master locomotor skills such as skipping, hopping, and running
- † Maintain personal fitness
- † Listen and follow directions
- † Master laterality, directionality, and balance

Spanish

The children are introduced to Spanish in a fun way. The program uses songs and games to learn colors, numbers, greetings, and some simple conversation.

General Information

Fieldtrips

A fieldtrip is planned each year. Parents are welcome to attend.

School Assemblies

One or more educational assemblies are planned each year.

Recess

Kindergarten students are taken outdoors when weather permits.

Report Cards/Progress Reports

Students will receive a report card at the end of each ten-week marking period.

Parent Conferences

Parent conferences are scheduled for late October. However, parents may schedule a separate conference at anytime.

Homework

For children to achieve school success the following is helpful. Help your child succeed by:

- † Providing a quiet area for looking at books
- † Discourage or prohibit TV on school nights
- † Read to your child daily
- † Listen to your child retell the story
- † Provide nutritious meals and plenty of exercise
- † Schedule sufficient rest (9 hours for kindergarten)
- † Show an interest in school activities
- † Keep communication lines open with the school
- † Visit libraries and museums

SchoolSpeak *Kindergarten - 8th Grade*

SchoolSpeak is an online communication tool which allows parents and students to view homework, newsletters, grades, and report cards. Parents and teachers can easily message each other when the need arises.
